**REPLACEMENT OF EXISTING NON-LED LIGHT FITTINGS TO LED
TYPE FOR 20 NOS. OF HIGHMAST AT TERMINAL 4 AT CHANGI
AIRPORT SINGAPORE
- LETTER OF REFERENCE**

GIB Automation Pte Ltd has successfully completed the replacement of the non-LED high mast lightings to LED-Type for the new Terminal 4 at Singapore Changi Airport.

Throughout the project implementation, we have found GIB Automation Pte Ltd to be reliable and cooperative despite the fact that the project was a time challenging one since it was carried out in an operational airport environment with a tight schedule. GIB Automation Pte Ltd had even completed this project in time and is currently in the DLP and maintenance phase.

This project faced a few challenges and unforeseen issues which GIB Automation Pte Ltd had successfully navigated through without lapse in work quality and safety. We are also pleased with your site coordination and work ethics and most importantly, you can work well with minimal supervision.

Overall we are satisfied with the quality, competence and the technical knowledge of your team and are happy to recommend GIB Automation Pte Ltd for any other similar projects in the future.

Yours Sincerely

Mohammad Zamri Bin Abd Hamid
Manager, External Engineering Systems
